

Secrets for Dealing with Difficult Teams

Course Description

As many experienced project managers know, the biggest problem encountered on projects is not related to resources or budget or technology, but to people—more specifically, communication with people. Getting people to work as a unit instead of a group of individuals is both challenging and frustrating, especially when team members are chosen ad hoc or assigned by upper management.

Secrets for Dealing with Difficult Teams will help you identify issues associated with bringing individuals together to work as a team, as well as review the sources of problems that affect teams. During this 12-hour course, you will learn to use tools and techniques to achieve collaboration and communication within your existing team, as well as identify and solve team-related problems before they get out of control. Team leaders as well as team members can benefit from this course, and will take away insights, tricks and best practices they can use as soon as the class is over.

Course Objectives

At the completion of this course, students will be able to:

- Define the various types of teams
- Understand and diagnose team dynamics
- Deal with factors which impact team performance, including personality, culture, communication and competition
- Identify potential team problems related to conflict, authority, absence of trust, commitment, accountability and results focus
- Implement solutions to address team-related problems
